PRICING INCLUDES SHIPPING TO KENAI • CUSTOM SIZES & INSTALLATION AVAILABLE

### EASTPOINT SERIES - 20' WIDE

#### Features:

- 4 ft. bow spacing
- Bows are 1.66" 14ga. galvanized tubing
- 3 purlins per greenhouse
- Strong and able to withstand snow loads
- Peak height 14', sidewalls 6'
- 6 mil greenhouse poly included
- Truss supports and wind bracing included
- 6' extended ground posts included
- NRCS approved

|                       |           | Base Package | Double Poly | Roll-up Sides | Auto Vent Kit |
|-----------------------|-----------|--------------|-------------|---------------|---------------|
| Eastpoint High Tunnel | 20' x 16' | \$2,200.00   | \$415.00    | \$780.00      | \$673.00      |
|                       | 20' x 24' | \$3,100.00   | \$485.00    | \$925.00      | \$673.00      |
|                       | 20' x 48' | \$5,000.00   | \$690.00    | \$1,340.00    | \$1,346.00    |
|                       | 20' x 72' | \$6,400.00   | \$900.00    | \$1,790.00    | \$1,346.00    |

### NOR'EASTER SERIES - 30' WIDE

#### Features:

- 4 ft. bow spacing with truss support assembly
- Bows are 1.90" 13ga. galvanized tubing
- 5 purlins per greenhouse
- Peak height 15', sidewalls 7'
- 6 mil greenhouse poly included
- Truss supports and wind bracing kit included
- 6' extended ground posts included
- NRCS approved

|                        |           | Base Package | Double Poly | Roll-up Sides | Auto Vent Kit |
|------------------------|-----------|--------------|-------------|---------------|---------------|
| Nor'Easter High Tunnel | 30' x 48' | \$6,600.00   | \$695.00    | \$1,160.00    | \$1,346.00    |
|                        | 30' x 72' | \$8,900.00   | \$955.00    | \$1,790.00    | \$1,346.00    |
|                        | 30' x 96' | \$11,400.00  | \$1,130.00  | \$2,200.00    | \$2,019.00    |

### CATAMOUNT COLDFRAME - 15' WIDE

#### Features:

- 4 ft. bow spacing
- Bows are one piece 1.32" 17ga. galvanized tubing
- Peak height 9'
- Easy set up
- Wind bracing included
- 6 mil greenhouse poly included

|                     |           | Base Package | Double Poly | Roll-up Sides | Auto Vent Kit |
|---------------------|-----------|--------------|-------------|---------------|---------------|
| Catamount Coldframe | 15' x 16' | \$1,450.00   | \$300.00    | \$780.00      | \$673.00      |
|                     | 15' x 24' | \$1,750.00   | \$400.00    | \$925.00      | \$673.00      |
|                     | 15' x 48' | \$2,600.00   | \$600.00    | \$1,340.00    | \$673.00      |
|                     | 15' x 60' | \$3,100.00   | \$700.00    | \$1,355.00    | \$1,346.00    |

**GREENHOUSE SUPPLIES:**

| 36" X 80" FULL LIGHT DOOR     | \$175.00 | 10' SLIDING DOOR KIT       | \$363.00 |

# Understanding the NRCS High Tunnel Program

In 2010, the USDA's National Resource Conservation Service started a program called the High Tunnel Initiative that offers grants to agricultural producers who use high tunnels to grow fruits and vegetables. This program aims to encourage growers to produce sustainable agricultural products and provide citizens with quality, locally-grown food. In order to receive funding, agricultural producers can apply for grants through the NRCS, provided that they meet certain requirements.

**What benefits does the program provide?**

Both established farmers and beginning producers can receive grants covering the cost of up to five percent of one acre, or 2,187 square feet. Qualifications for projects vary by state, but the purpose of the high tunnel must be to extend the growing season, improve plant quality, improve soil quality and improve water quality. The USDA will provide financial assistance for the costs of purchasing and installing the seasonal high tunnel. EQIP may also provide funding for supporting practices that are required for the high tunnel program, such as runoff management, pest management, crop rotation and more.

**How do I apply?**

Before applying, you should consider if you would qualify for a high tunnel project grant. You must be an agricultural producer that has cultivated or sold at least \$1,000 worth of products, or you must be able to show how you plan to do so once in operation. The land you plan to grow on must already be in agricultural production or at least recently cultivated, and you must meet all NRCS standards prior to installation.

Rimol Greenhouses High Tunnel systems have been approved by the NRCS as qualifying EQIP structures in a number of states. If you are interested in participating in this program, please contact Kenai Feed so we can guide you through the process of purchasing and installing a Rimol High Tunnel.
